Rail sabotage near Medford Oregon in solidarity with the Olympia train blockade

NOVEMBER 30, 2017

Submitted Anonymously

A few days ago, inspired by the [Olympia train Blockade](#), we used copper wire to signal a blockage and disrupt rail traffic near Medford Oregon. Railways are easily accessible and everywhere. Sabotage is fun and easy.

Solar Warden Space Fleet

USSS HILLENKOETTER

Date of Commission: 1988

Type: Classified Interplanetary Exploration Spacecraft (Sol)

Purpose: According to famed internet hacker, Gary McKinnon, these spacecraft are part of the "Solar Warden" program and the US currently operates eight of these ships. They are said to be part of a secret military space program spearheaded by the US Naval Space Weapons Division (MILAB). McKinnon found several files listing "non-terrestrial officers" as well as "ship to ship transfers" with ship names that don't exist in the US Navy, namely the USSS Hillenkoetter and the USSS Curtis Lemay. One of the photos he managed to view was, in his words, "...above earth's hemisphere...it kind of looked like a satellite, it was cigar shaped and it had geodesic domes above, below, to the left and right and on both ends of it. Although it was a low resolution image it was quite close up." These craft are said to be longer than two football fields placed end to end and nearly as long as an aircraft carrier.

Combined with testimony from MILAB whistleblower Corey Goode regarding the Solar Warden ships, we are able to piece together a possible look and feel of the ships they both discuss. Given that this program would have begun in the late 80's it's reasonable to assume it would look like something produced by a joint venture between all of the top aerospace manufacturers of the time, Lockheed, Northrop, Boeing and British Aerospace.
